Re: T-Hangar Apron Drainage Improvements
Resolution Approving plans, Specs & Setting Bid Opening Date

INTRODUCTION: Recently the City of Muscatine was notified by the Federal Aviation Administration (FAA) that funding would be made available to improve drainage in the apron area of the t-hangars at the Muscatine Municipal Airport.

BACKGROUND: The T-Hangar Drainage Improvements Project will include removing an existing French drain system and installing storm sewer intakes, storm sewer, and an outlet upstream of a proposed septic system manhole or existing oil/water separator. The existing clogged French drain system has no outlet and stands full of water, which leads to dangerous icy conditions in front of the existing t-hangar in the late winter/early spring.

Prior to the soliciting bids for this project, a public hearing is required. Following the Public Hearing, the City Council will have the opportunity to consider approval of the plans, specifications, form of contract, engineers estimate, and establish a bid opening date for the Project.

RECOMMENDATION/RATIONALE: Please place the attached resolution on the agenda for City Council consideration during the July 5, 2012 meeting.

1. Resolution
