RE: Change Order – Harrison Street Extension Project

INTRODUCTION:

The Muscatine Community School District would like to construct a drop off lane for the students attending Colorado School as part of the City's Harrison Street Extension Project.

BACKGROUND:

Martin & Whitacre has designed a two lane configuration at the back of Colorado School accessible from Harrison Street that will allow students to be dropped off and picked up before and after school. This improvement moves the students from the front of Colorado School to the rear. This is important because of the future reconstruction of Colorado Street. The improvement will cost the school district \$65,400 and has been reviewed by the School Board. It is important that this Change Order in the amount of \$65,400 be approved because construction is underway and is necessary to have the lanes available by the start of school in August.

RECOMMENDATION/RATIONALE:

It is the Public Works Staff's recommendation to approve this Change Order. The cooperation between the City and the School District has allowed this to happen and is a significant improvement for the safety of children attending Colorado School.
