Re: **West Hill Sewer Separation Easements/Property Acquisitions - Phase 2**

INTRODUCTION: The West Hill Sewer Separation Project – Phase 2 is a continuation of the West Hill project that began in 2012 and is planned to continue for the next several years. In order to complete the Phase 2 work, temporary & permanent easements and other property acquisitions from eleven property owners must be acquired by the city. Five of the properties are proposed to be acquired through delinquent property tax sales. The remaining easements/properties are being acquired through the normal valuation/negotiation process. Negotiations to complete the easements have been conducted or continue to be conducted with those property owners. A table showing which easements have been completed is attached. Council approval of that list is requested.

BACKGROUND: The City of Muscatine has traditionally used a 20% value of the assessed valuation to determine the respective costs of temporary easements. The final value/cost is determined by first establishing the square footage cost of the property, based on the assessed value; and then multiplying that square footage cost by the square footage of the easement. Adjustments to these base values are made for riparian and landscape vegetation that was present on these properties. Those figures were determined by the Muscatine Community Development Department and approved by Public Works Director Randy Hill.

RECOMMENDATION/RATIONALE: Approval of the easements and other associated documents is recommended
