City Administrator Report to Mayor & City Council

September 06, 2013, Edition No. 99

REPORT:

1. Blue Zones Kickoff: Please see the attached pdf regarding the Blue Zones Kickoff event to be held September 10th at the Muscatine High School. Hope to see you there!
2. IISC: Please note that the Iowa Initiative for Sustainable Communities meeting was changed to Thursday, September 12th as not to conflict with the Blue Zones Kick Off event on September 10th. Attached is a flyer for the IISC event which will take place from 3:30 to 5:30 pm.
3. MMGC: Please see the attached spreadsheet detailing golf rounds year-to-date.
4. Pocket Park: As part of the CSO project, the plan has been to grade, seed, and add a few trees (perhaps a sidewalk and bench) to the City property at the corner of 8th and Cedar. The P&R Commission received a concept or request to add veteran memorials along the sidewalk internal to the "pocket park". The commission endorsed the concept and it should be brought before the Council next week. Our plan for this area has been to keep it low maintenance.
5. Fire Department: Attached is the press release on the cardiac enzyme testing. Muscatine is the first ambulance service in the state to do this testing in the field. It's important because the results of the blood test can show someone having a heart attack, even though the 12 lead from the cardiac monitor isn't showing any abnormalities. This enables the department to get the patient quickly to a cardiac cath lab to have an angioplasty and thus a better patient outcome. The ambulance transports to Genesis East in Davenport to get the patient straight into the cath lab. Similar to a burn patient needing to go straight to the U of I burn unit. The department went live with the testing on August 20th. The Medical Director approved it and we changed our paramedic protocols and added testing equipment to ambulances. This was all paid for through a \$ 10,000 grant through Carver Charitable Trust.
6. Meetings: Here is a sample of the monthly meetings attended - Blue Zone Leadership and Community Policy, United Way Board, Chamber Board (as well as weekly ribbon cutting/after hours events) and Economic Development Committee, Iowa League Legislative Policy Committee, Iowa League Executive Board, and our joint meetings locally between the City/School/MCC/MPW/Trinity.
7. Conferences: Just a quick heads up regarding two conferences in September: I will be attending ICMA's annual conference from 9/21 through 9/25. The Iowa League's Annual meeting and conference will be held in Dubuque 9/25 through 9/27.
8. Upcoming Issues: Please be aware that September through December will begin to get rather busy from a meeting perspective. There are several issues that will be coming before the City Council - annual goal setting session, City Code review, and union negotiations (non-meeting).

"I remember Muscatine for its sunsets. I have never seen any on either side of the ocean that equaled them" — Mark Twain

FIRE DEPARTMENT

Press Release

Cardiac Enzyme Testing

On August 20th, 2013 the Muscatine Fire Department began providing a Cardiac Status blood test to its patients who are having symptoms of a heart attack. Many emergency rooms across the United States use this new procedure, which has proven to be beneficial in the patient's outcome during a cardiac emergency. Now, the Muscatine Fire Department has the distinction of being the first EMS provider in the State of Iowa to offer this type of testing in the field.

Last year the department became aware of this new testing. Firefighter Tom Summitt, department grant writer, approached the Carver Charitable Trust to see if they would be interested in making this happen.

With a generous grant from the Roy J Carver Charitable Trust, the Muscatine Fire Department is now testing this new procedure that can rapidly identify someone suspected of having a non-ST segment elevation myocardial infarction (heart attack).

Typically when responding to a person having chest pain, an EKG is done, which can in some cases identify a heart attack, but only 50% of the time is this diagnosed on the EKG alone. This new simple blood test, aids in the diagnosis of acute myocardial infarction, delivering critical information accurately and reliably when and where it is needed. The tests are a simple 3 step process, 15 minute assays for the detection of CK-MB, Myoglobin, and Troponin I- cardiac enzymes. This test will allow us to detect elevated enzymes earlier in the cardiac event which will allow us to treat heart attacks more aggressively while transporting the patient to a cardiac specialist.

Darrell Janssen, Battalion Chief

Muscatine Fire Department
